PROJECTS

Spotify Clone

2023

Spotify Clone using Web API's

Developed ReactJS-based Spotify clone with user authentication, playlist management, and playback control. Offers immersive music streaming, replicating core Spotify functionalities.

Weather forecast

2023

Weather forecasting application using open weather API

Built an application using Open Weather API that provides users with real-time weather updates for their current location and searched locations. Delivering accurate weather information with a user-friendly interface.
