PROJECTS

- 🏠 **codelt (online coding platform)** Currently building an online coding platform using Next.js, Monaco Editor, GraphQL, Docker, Prisma, PostgreSQL, Zustand, and Supabase. Features include support for multiple programming languages, secure code execution, robust data management, state management, authentication and more.
- 🏠 **Real Estate Platform** Contributed to the development of a full-stack real estate platform (Proptzo) using the MERN stack, implementing online KYC checks and document verifications with Surepass verification APIs. Also, integrated CloudFront and S3 for document uploads and shifted the project to Next.js for better performance.
- 🎧 **Spotify Clone LINK** Created a ReactJS Spotify clone with secure user authentication using the Spotify API. Included playlist management, playback controls, and integrated original Spotify API for seamless media song streaming, showcasing expertise in external API utilization and immersive music experiences.
- 📞 **WhatsApp Clone LINK** MERN-based WhatsApp clone with real-time messaging via Socket.io, OTP-based user authentication, dark/light theme, and profile image upload with status and username.
- 🌤️ **Weather Forecast LINK** Crafted a ReactJS weather app with Open Weather API for real-time updates on current and searched locations. Emphasized accuracy, user-friendly design, and reliable weather data integration.

SKILLS

Frontend

React Typescript React Native Recoil Zustand Tailwind Aceternity UI Shadcn/ui

Backend

Node Express MongoDB WebSocket GraphQL Prisma Mongoose

Version Control

Git GitHub

Deployment

Hostinger Vercel Netlify GitHub Pages
