Govt Model Senior Secondary School Sector 23-A Chandigarh

PROJECTS

YouTube Clone
LINK
Currently building a YouTube clone on the MERN stack with GraphQL for faster API communication and client-side efficiency. Features include JWT authentication, advanced video content management, and other enhancements for an enriched user experience.

Cosmos Reactors
LINK
Currently developing a MERN stack web app that offers detailed information about planets and solar systems through NASA API. The project includes features like video content management, user authentication, and more for an immersive experience.

Portfolio
LINK
Crafted a personal portfolio with React and Tailwind CSS, featuring my skills and projects. Integrated getform.io for easy viewer contact, ensuring a seamless communication experience.

Spotify Clone
LINK
Created a ReactJS Spotify clone with secure user authentication using the Spotify API. Included playlist management, playback controls, and integrated original Spotify API for seamless media song streaming, showcasing expertise in external API utilization and immersive music experiences.

Weather Forcast
LINK
Crafted a ReactJS weather app with Open Weather API for real-time updates on current and searched locations. Emphasized accuracy, user-friendly design, and reliable weather data integration.

Instagram Clone
LINK
MERN stack Instagram clone with user authentication, image upload, Pixels API for media rendering, NASA API for dynamic descriptions, and dynamic dark/light theme.

E-DashBoard
LINK
Designed and developed a MERN dashboard with user authentication, product rendering, and cart functionalities for seamless product management.

WhatsApp Clone
LINK
MERN-based WhatsApp clone with real-time messaging via Socket.io, OTP-based user authentication, dark/light theme, and profile image upload with status and username.

SKILLS

Frontend React | Tailwind | Bootstrap | Material Ui

Backend Node | Express | MongoDB | WebSocket | GraphQL, Mongoose

Version Control Git | GitHub

Deployment Netlify | GitHub Pages
